

WITH PADSXPRESS YOU HAVE A POWERFUL AND AFFORDABLE SOLUTION TO PROVIDE YOUR AUDIENCE AT THE RIGHT MOMENT WITH THE RIGHT, TARGETED INFORMATION.

The PADSXPRESS digital signage software is a bundle of applications enabling you to design, schedule, distribute, display and analyse a wide variety of content.

The extensive features of this network based software are more than sufficient to fulfill all requirements of the most popular digital signage applications in any market segment.

- Welcoming visitors to your premises
- Informing clients of your company's latest news
- Advertising new products or services
- Communicating with your employees
- Providing clear and accessible directions

DESIGN - PADS DESIGNER

PADS Designer is a powerful design tool that allows you to compose presentations with a wide variety of content. Using text, graphics, videos, web content, Macromedia Flash, RSS and more you can design your own appealing presentations, exactly the way you like. With just a couple of mouse clicks your content can be linked to external databases to feed your presentation with real-time data.

Key features

- Designing presentation with a wide variety of content
- Text, images, videos, web pages, Flash and more
- Master pages for a consistent layout
- Database connections for displaying real-time data
- Support of interactive presentations

DISTRIBUTE - PADS SERVER

PADS Server ensures that your scheduled presentations including everything that's related end up with the right displays, regardless of where in the world these displays are. Using our unique synchronization mechanism pictures, videos and other content files are distributed with a minimal network load. You can fully determine yourself when and under what conditions this should occur. If your presentations contain real-time data then PADS Server can collect this information for you from various data sources and make it available to the connected displays.

Key features

- Automatic distribution of scheduled presentations
- Targeted distribution of content files
- Automatic collection and distribution of real-time data
- Distribution over LAN, WAN, Intranet or Internet
- Minimum network load
- Secured communication via data encryption

ANALYSE - PADS AGENT

The PADS Agent application is an essential tool if you want to stay informed about the operation of your digital signage system. In this application all relevant functions have been bundled to monitor and manage the PADS Server and PADS Viewers of your system. All this can be done remotely from your workplace anywhere in the world.

PADS Agent saves system administrators a lot of time in the provision of maintenance and support.

Key features

- Remote monitoring and management of your server and displays
- Retrieval of valuable system information
- Automatic notification in case of failures
- Scheduling tasks for performing operations
- Central installation of software updates
- Cost saving for maintenance and support

SCHEDULE - PADS MANAGER

With PADS Manager you schedule your designed presentation for playback at the right moment and right destination. You can schedule your presentation for an individual display or group of displays. At any time you can adjust the schedule or content of your presentation within a few seconds, even if it is currently playing.

Key features

- Easy scheduling of presentations
- Unlimited grouping of displays
- Priority based scheduling
- Live changing schedules or content

DISPLAY - PADS VIEWER

The PADS Viewer application ensures that your scheduled content is played perfectly and at the right moment on a display.

When playing, PADS Viewer can dynamically insert real-time content into your presentation. By this the displayed information is always up-to-date and corresponds to the situation of that time.

Besides the standard PADS Viewer Net Display Systems also offers PADS Desktop Viewer enabling you to simply and quickly inform your employees on the PC at their workplace, group wise or individually.

Key features

- Playback of scheduled presentations
- View at real size or resolution independent
- Real-time insertion of dynamic content
- Local caching as fallback to network failures
- Compatible with interactive touch screens
- Desktop Viewer for playback at workplace

RECOMMENDED HARDWARE SPECIFICATIONS

A typical PADS configuration consists of a central PC on which the PADS Designer, PADS Manager, PADS Server and PADS Agent software are installed. In addition every public display has a PC built-in or attached to it on which the PADS Viewer software is installed. As an alternative PADS Designer, PADS Manager and PADS Agent can be installed on separate PCs.

All components are connected to each other through a network. This can be a LAN, Intranet or Internet connection.

For the PADS Viewer PC we recommend:

- Processor: Intel Core2Duo (2.00 GHz)
- Memory: 2,048 MB
- Video card: Tier-2 compatible
- Video memory: 256 MB or more
- Operating system: Windows 7 or Vista

The PADS Server PC system requirements are determined by the number of connected PADS Viewers and the amount of content to be distributed.
